

Assignment -2

Assignment Date	1 October 2022
Student Name	MOHAMMED ATHANAN M
Student Roll Number	73771914137
Maximum Marks	2 Marks

1. Create User table with user with email,usernameand password.

The screenshot shows the IBM Db2 on Cloud interface. The 'Tables' tab is selected, and the 'Table definition' for the 'USERS' table is displayed. The table has three columns: USERNAME, EMAIL, and PASSWORD, all of type VARCHAR with a length of 32 and a nullable status of Y. The table is located in the YGG09863 schema.

Name	Data type	Nullable	Length	Scale
USERNAME	VARCHAR	Y	32	0
EMAIL	VARCHAR	Y	32	0
PASSWORD	VARCHAR	Y	32	0

2. Perform UPDATE,DELETE Queries with user table

The screenshot shows the IBM Db2 on Cloud interface with the 'Data objects' tab selected. The 'My script' editor is open, showing the execution of two SQL queries. The first query is an INSERT statement, and the second is a DELETE statement. The 'History' tab is also visible, showing the execution details of the queries.

```

1 insert into users values('maryada','sample123','maryada@student.tce.edu');

```

3. Connect python code to db2. (Done in question 4)

4. Create a flask app with registration page, login page and welcome page. By default load the registration page once the user enters all the fields store the data in database and navigate to login page authenticate user username and password. If the user is valid show the welcome page **app.py**:

```
#!/usr/bin/env python3
```

```
# -*- coding: utf-8 -*-
```

```
"""
